

Empathy Map

Date	03 October 2026
Team ID	FITBUDDY-TEAM
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	2 Marks

Target User: Person Starting or Maintaining a Fitness Routine

Area	Observations
Says	“I want a plan suited to my goal.” “I need something simple enough to follow.”
Thinks	“Is this workout appropriate for my selected intensity?” “Can I change it if it is too difficult?”
Does	Enters age, weight, goal and intensity; reviews the seven-day plan; gives feedback when changes are needed.
Feels	Motivated when the plan is clear; uncertain when recommendations are generic; more engaged when the plan can be updated.
Pains	Generic routines, repeated manual planning, difficulty adapting routines and scattered nutrition advice.
Gains	Goal-oriented weekly structure, quick AI assistance, nutrition/recovery guidance and stored plans.

Design Implication

FitBuddy should minimize data entry, present the generated plan in a readable form, make feedback easy to submit and retain both user information and generated plans for later access.

Team Ownership

Afraar M – user journey and interface; Deepak B – AI interaction; Dinesh N – system workflow; Vinesh D – data and validation considerations.
