

Proposed Solution

Date	03 October 2026
Team ID	FITBUDDY-TEAM
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	3 Marks

Proposed Solution Overview

FitBuddy is a web-based AI fitness planning application. A user provides basic fitness information including age, weight, goal and preferred workout intensity. The FastAPI backend validates the request and sends a structured prompt to Gemini. The returned response is displayed as a seven-day workout plan with a complementary nutrition or recovery tip.

Core Components

1. **User Interface:** Registration/login, fitness input form, result page and dashboard.
2. **FastAPI Backend:** Receives requests, validates input, coordinates AI generation and persistence.
3. **Gemini Integration:** Generates workout plans, nutrition/recovery tips and feedback-based revisions.
4. **SQLite Database:** Stores user details and generated plans.
5. **Feedback Loop:** Uses the existing plan plus user feedback to produce an updated plan.

User Flow

```
Register/Login → Enter Fitness Details → Generate Plan → Review
                                     ↓
                               Nutrition/Recovery Tip
                                     ↓
                               Submit Feedback
                                     ↓
                               Updated AI Plan
```

Team Responsibilities

Dinesh N – FastAPI/backend; Afraar M – frontend and dashboard; Deepak B – Gemini integration; Vinesh D – database validation, testing and documentation.
