

Sample Project Documentation

Date	03 October 2026
Team ID	FITBUDDY-TEAM
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	3 Marks

Project Summary

FitBuddy – AI Fitness Plan Generator using Gemini Models is a web application that generates personalized seven-day workout plans and complementary nutrition/recovery tips from user fitness information. It also supports feedback-based plan refinement. The supplied project information states that FastAPI, Gemini, Jinja2 and SQLite are the core technologies.

Updated Plan

Main Modules

- `main.py / routes.py` – application routing and request flow.
- `gemini_generator.py` – workout generation.
- `gemini_flash_generator.py` – nutrition/recovery tip generation.
- `updated_plan.py` – feedback-based plan revision.
- `database.py` – persistent user and plan information.
- `auth.py` – authentication support.
- `templates/` – user interface pages.
- `static/` – styling and BMI client-side functionality.

Team Documentation Ownership

Dinesh N documents architecture and backend; Afraar M documents UI and user flow; Deepak B documents AI integration; Vinesh D documents testing, validation and deployment.
