Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	2 Marks

Project Pitch

FitBuddy is an AI-powered fitness planning web application that converts a user's basic fitness profile into a structured seven-day workout plan, adds a goal-aligned nutrition/recovery tip, and adapts the plan when the user provides feedback.

60-Second Explanation

1. A user registers/logs in and provides age, weight, fitness goal and workout intensity.
2. FastAPI validates the request and sends the relevant context to Gemini.
3. Gemini generates the personalized seven-day routine and complementary tip.
4. The result is stored and shown through the Jinja2 interface.
5. The user can submit feedback and receive a revised plan.

Speaker Allocation

- **Dinesh N:** problem, architecture and backend workflow.
- **Afraar M:** UI, registration, dashboard and user experience.
- **Deepak B:** Gemini integration, prompts and adaptive plan generation.
- **Vinesh D:** BMI, persistence, validation, testing and future improvements.
