

Project Executable Files

Date	03 October 2026
Team ID	FITBUDDY-TEAM
Project Name	FitBuddy – AI Fitness Plan Generator using Gemini Models
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Status
1	Complete source code	Yes
2	README / setup guide	Yes
3	requirements.txt	Yes
4	Database module / schema	Yes (app/database.py, app/models.py)
5	Environment configuration	Yes (.env.example)
6	Deployed application URL	NA – local execution in supplied project
7	Mobile/Desktop executable	NA – web application
8	Test evidence	Project testing can be performed locally
9	Demo video	https://drive.google.com/file/d/1GUAX9Uvcn2qIYcvukH3HF98s8bL_44WI/view?usp=sharing
10	Github link	RBDinesh3057/SDC-Project

Step 2: File / Folder Structure

```
SDC-Project-main/  
|-- app/                FastAPI, authentication, database and Gemini modules  
|-- templates/          Jinja2 HTML pages  
|-- static/             CSS and client-side BMI script  
|-- requirements.txt     Python dependencies  
|-- .env.example         Environment variable template  
`-- README.md           Project setup and usage information
```

Step 3: Run Instructions

1. Install Python and create a virtual environment.
2. Install dependencies using `pip install -r requirements.txt`.
3. Configure the Gemini API key through the environment configuration.
4. Start the FastAPI application using Uvicorn according to the supplied README/application entry point.
5. Open the local application in a browser.
6. Register/login, enter fitness information and generate a plan.

Team Ownership

Dinesh N – application execution/integration; Afraar M – UI demonstration; Deepak B – AI configuration; Vinesh D – documentation and test evidence.
